Our Values

Experience

Quantum's foundations lie in kitchen manufacturing knowledge and experience. In 1975, the first cabinet was built, and from there, Quantum was born. These bespoke kitchens have been cultivated by Quantum's highly respected CEO who grew up around the business, and the ever-expanding team.

Every Quantum kitchen is made to order, to ensure you receive durable, purpose-built cabinets. Each cabinet is crafted using a combination of state-of-theart machinery and classic workmanship, resulting in both precision-built kitchens and exceptional quality. Quantum cabinets are all hand-assembled and undergo rigorous quality checks before leaving the premises.

Reliability

Each Quantum kitchen comes with a full 25-year guarantee on doors, drawers, cabinets and hinges. With coverage such as this, you're left with peace of mind that your kitchen is not only built to last, it is guaranteed to last.

For more information visit www.quantum-kitchens.co.uk/guarantee

Responsibility

Conscious of the environmental impact manufacturing can generate, Quantum endeavours to use only wood materials sourced from well-maintained, sustainable forestry. Additionally, all wood waste created during the production of your kitchen is recycled as a source of energy, heating Quantum's factory and offices, consequently reducing our carbon footprint.

Origin

Origin is a beautiful, eclectic range of kitchens, covering modern, handleless profiles through to traditional shaker doors. With a wide range of styles, designs and finishes available, you can opt for a unique blend of doors to create a truly exceptional kitchen. This collection is incredibly versatile, extending itself beyond the kitchen and into living areas. From open floating shelves to bench seating, you can cultivate the entirety of your home to suit your taste.

The furniture exhibited within the coming pages offers the capacity to not only accommodate your lifestyle choices, but to embrace them. No matter how you and your family operate, your kitchen design doesn't need to result in any compromise. Whether you're looking to include certain appliances, or would like to create a particular ambience within your home, this eclectic collection of door styles has been selected to provide you with flexibility and choice.

The design preferences and vision you have for your kitchen and other living areas can be transformed into a reality by a network of independent retailers. Each Quantum studio has been carefully chosen to provide you with a reliable, experienced team who are equipped to meet your unique needs.

Design Tip

Your kitchen doesn't have to be confined to just one room. Every home is unique, and no matter your space or your needs, you can create an individual design perfect for your house. If your traditional kitchen space is too small, and you have room to accommodate, you can prioritise your kitchen space and create a utility or practical pantry room for items you can't or do not want on display in your kitchen.

Silverton

This modern, gentle shaker design is the ideal choice if you're looking to put a contemporary spin on a farmhouse kitchen. The bevelled edges offer a softened design, especially compared to traditional shaker doors. The smooth finish and narrow shaker frame provide a modern style, while neutral colours, natural materials and traditional accessories offer the essential edge when melding tradition into the design. The key to this interior design trend is to combine the most charming characteristics of a country kitchen with contemporary favourites.
